Subject Work Set 34 and 40 Agreement

CDPHE hereby agrees that the work proposed in your 10/29/98 memo may occur under the regulatory process identified in the draft DPP (10/8/98 version)

In your proposal, you identified the availability of work packages and radiation surveys for these tasks for oversight review during development and implementation. We request the following information be provided for each set prior to implementation: a summary of previous survey data, the characterization/survey plan, and a description of dismantlement/removal activities (IWCP/RWPs). As we've previously discussed, submittal of an approx 90% complete IWCP and/or RWP is adequate provided no significant changes occur during finalization.

In addition, please define the type of management review to occur prior to implementation of this work and the anticipated schedule.
